About G-LMS Product:

- G-LMS is self-service portal integrated with PFMS (Public Fund Management System) for viewing and managing real-time fund position in structured formats. G-LMS is a Liquidity and Fund Management Solution and works as a tool for ensuring transparency by helping the Government departments to monitor the flow of funds from various schemes to beneficiary.

- G-LMS helps to forecast the government's daily cash balance position and its cash flow requirements. Client can manage their welfare schemes and get real-time MIS and Dashboard. In G-LMS we provide Dashboard where distribution of funds, availability of funds and end use of funds can be monitored.
